**THE HEIGHTS
1970
ASSUMPTION
COLLEGE
Worcester
Massachusetts**

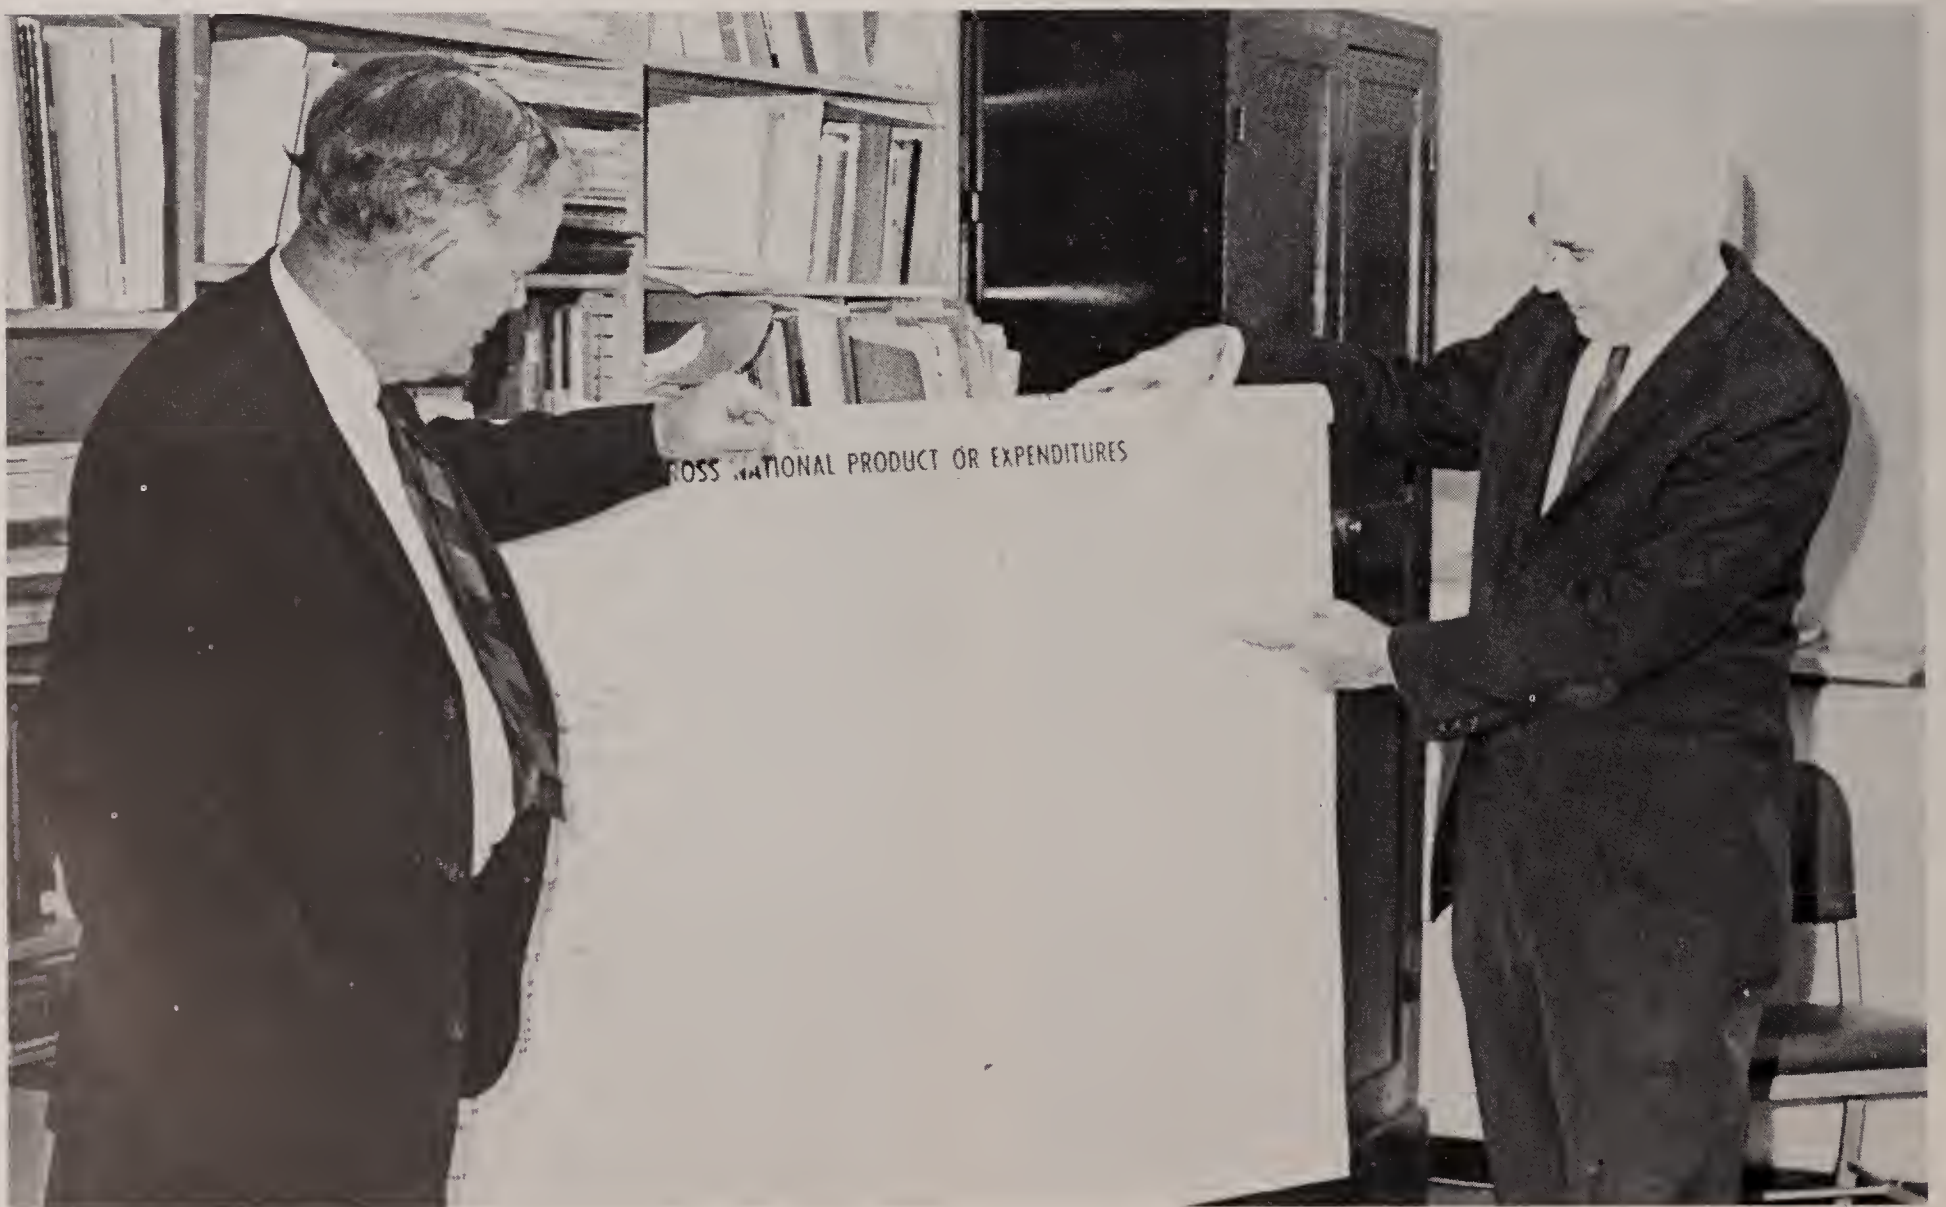

DEDICATION

You were waiting outside with so much else of what life is.
1969-1970: Student awareness has lifted its head and Assumption College has begun to open its doors and its mind to reality.

You came during the period of change, contributing a big part of the reality and relevance of which we are in need. And so this yearbook is dedicated to you, the first female class at Assumption.

*We began with many
who were new*

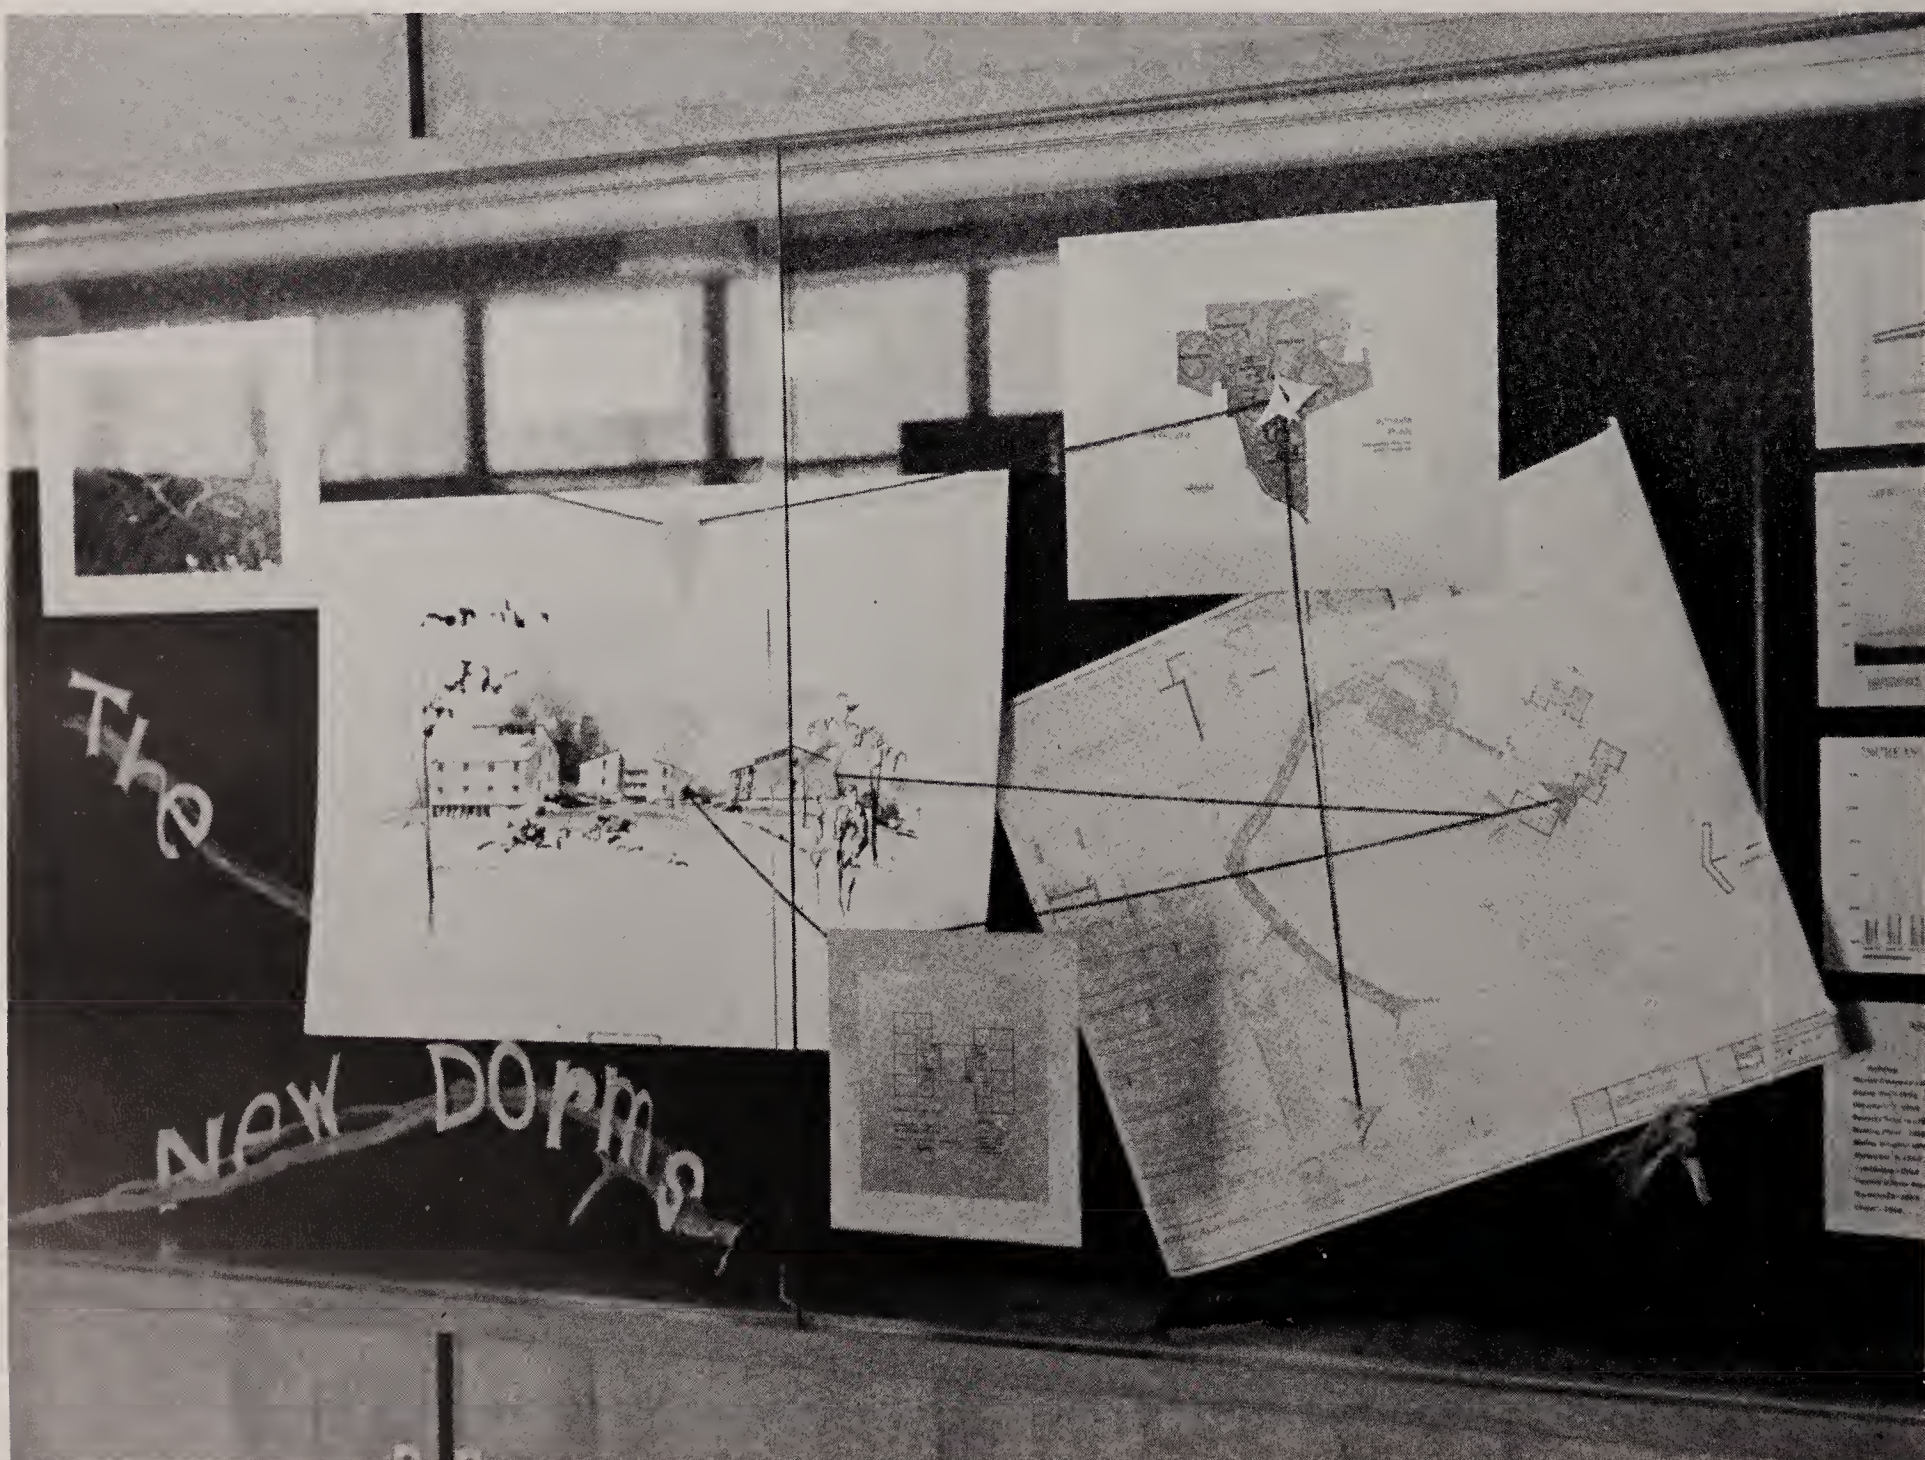

But we began together.

And for a long time
we were still beginning—

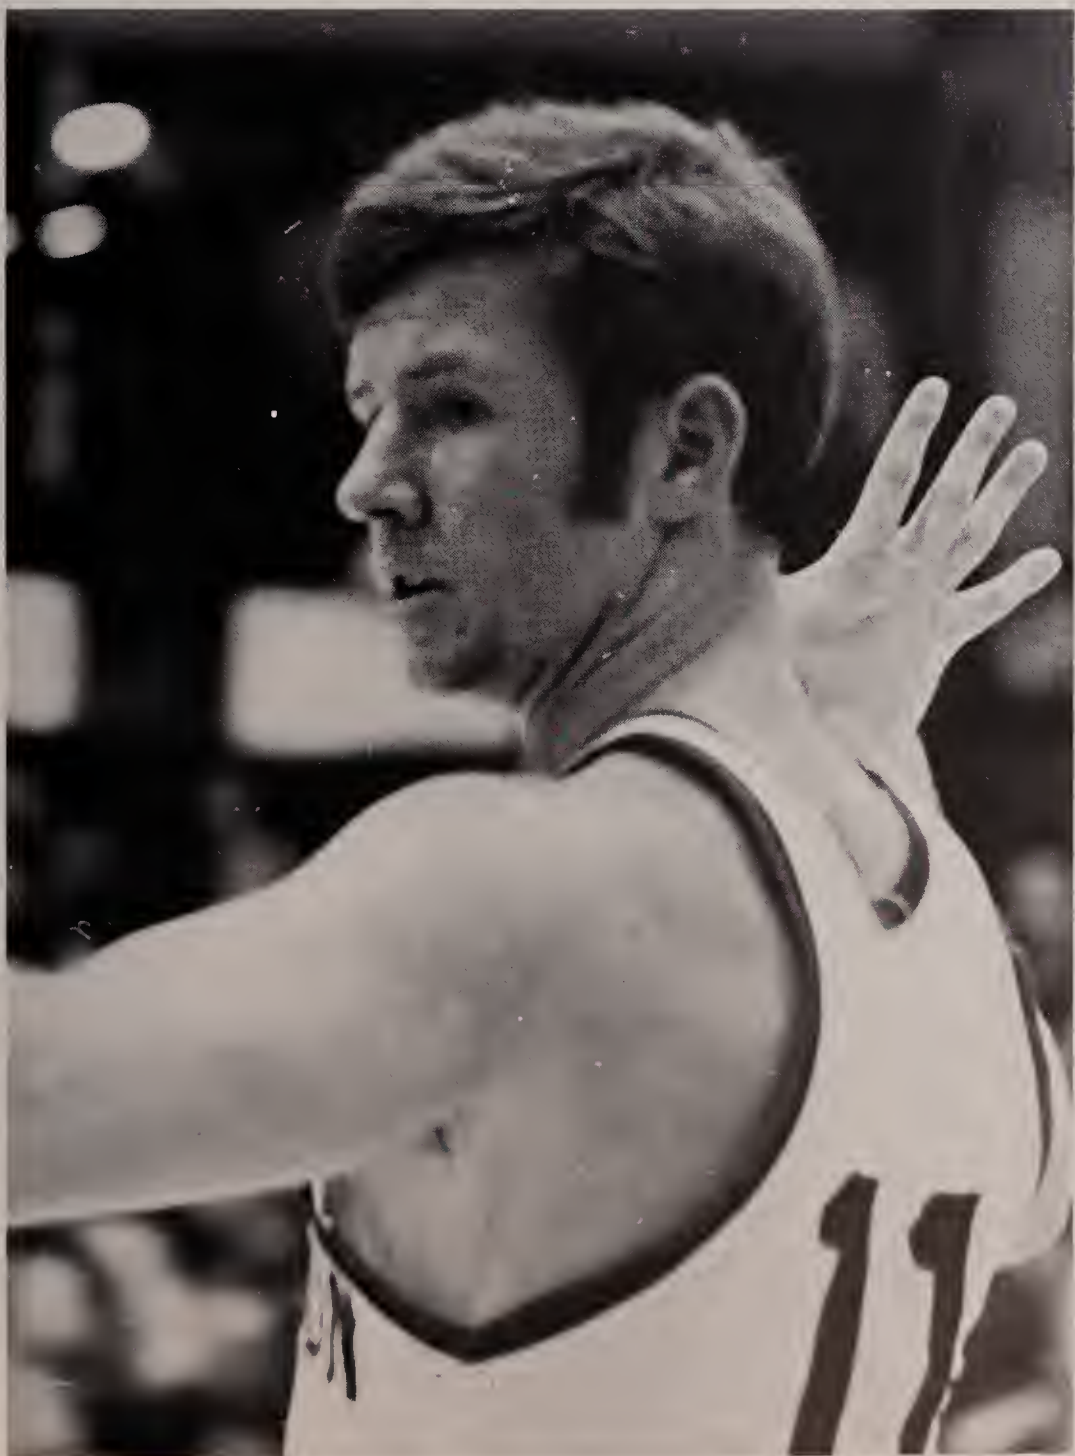

together.

*We worked, and
when reality did not meet our hopes,*

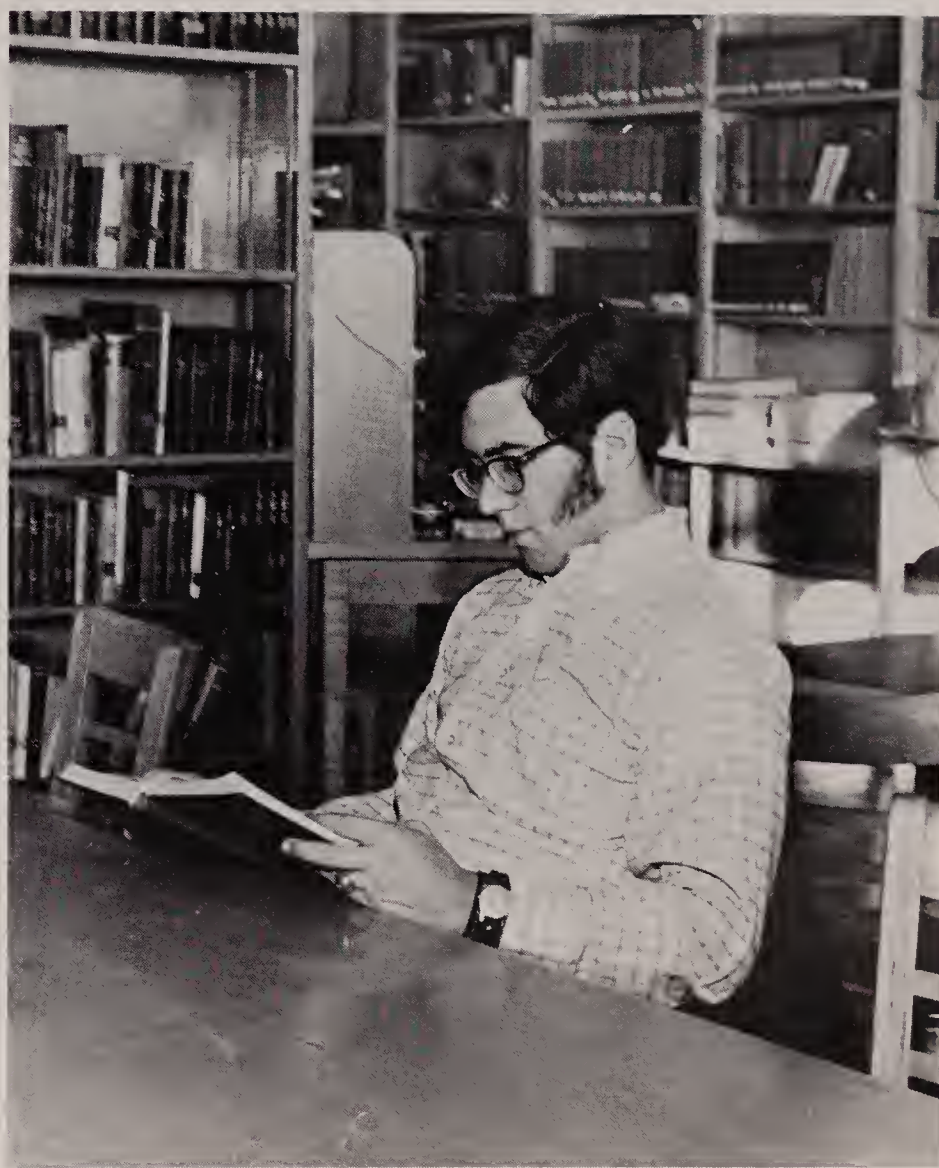

*we found consolation—
or solitude and strength.*

*For some,
little changed.*

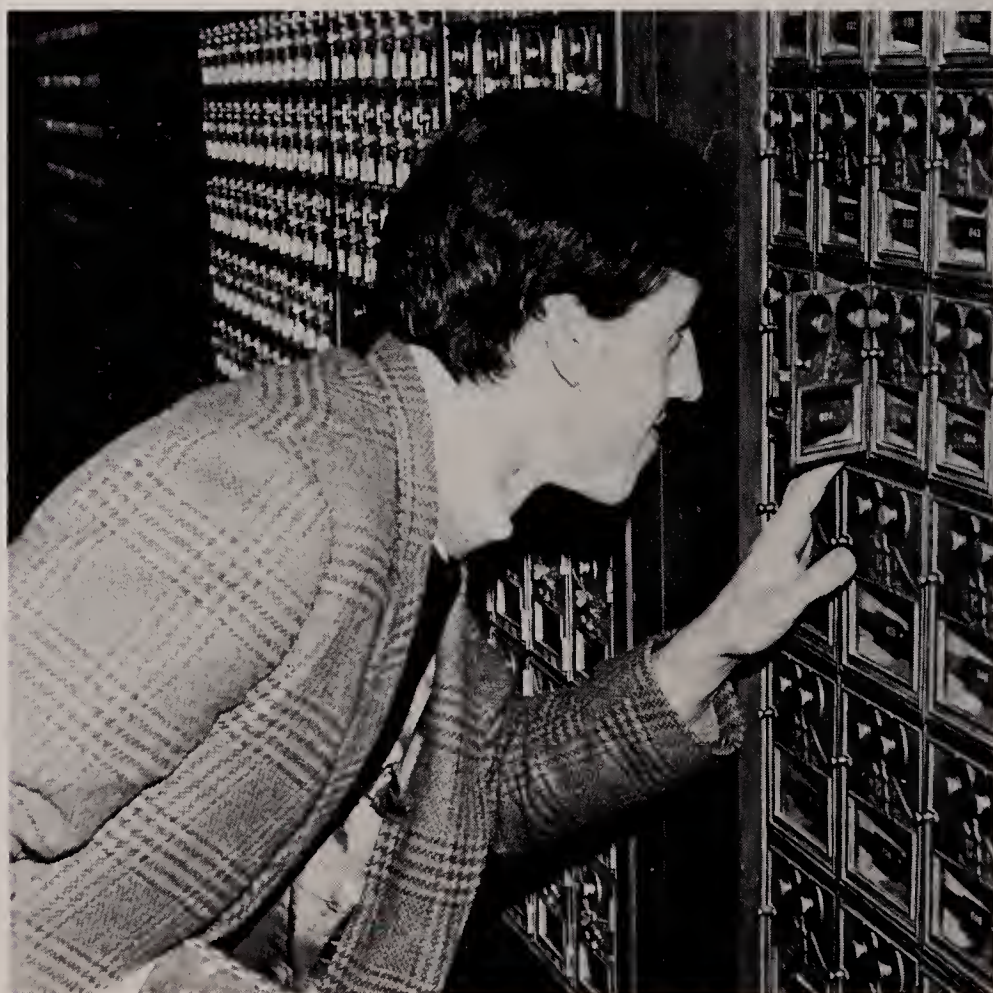

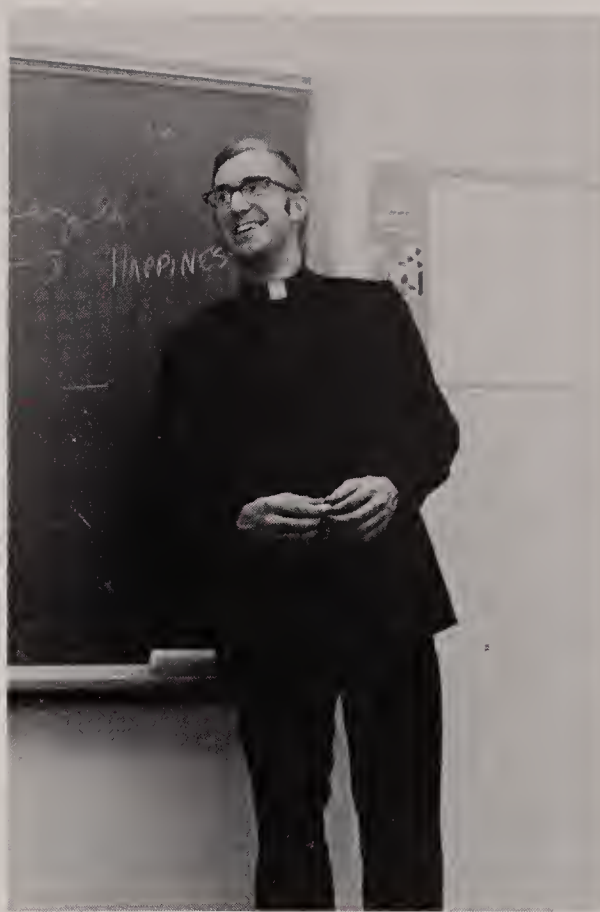

For others, little remained the same.

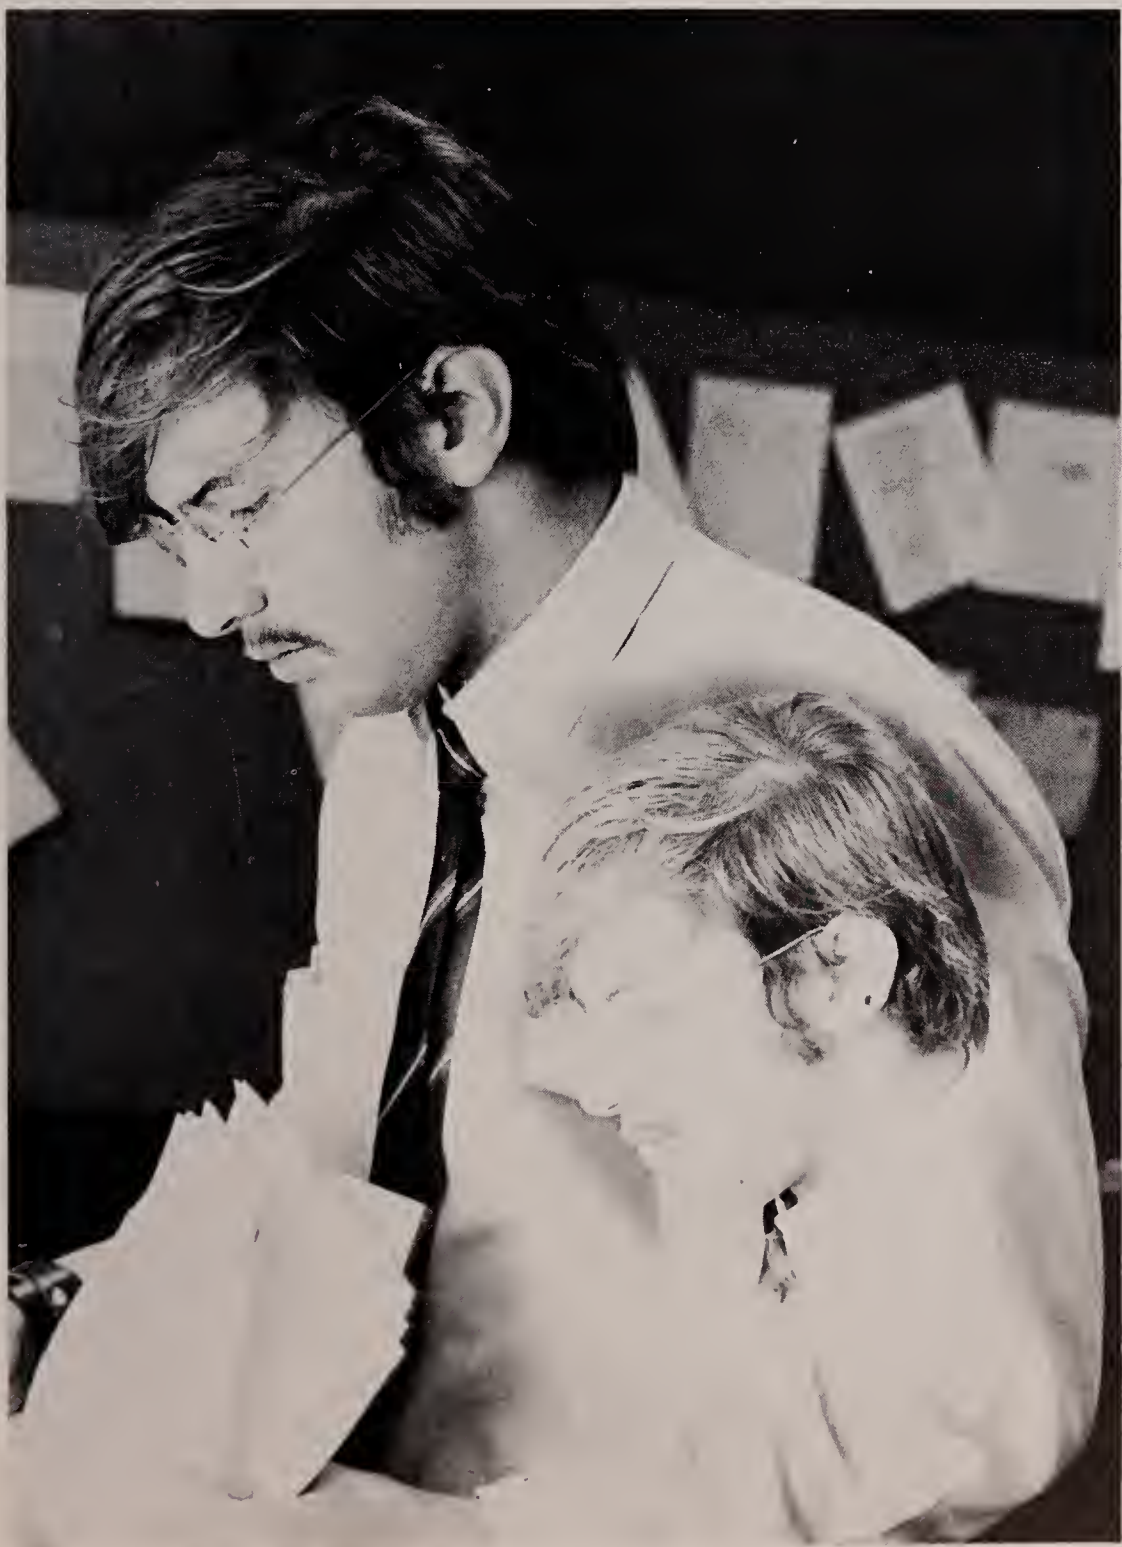

*But we could remember
that which we wanted,
or that which we sought,*

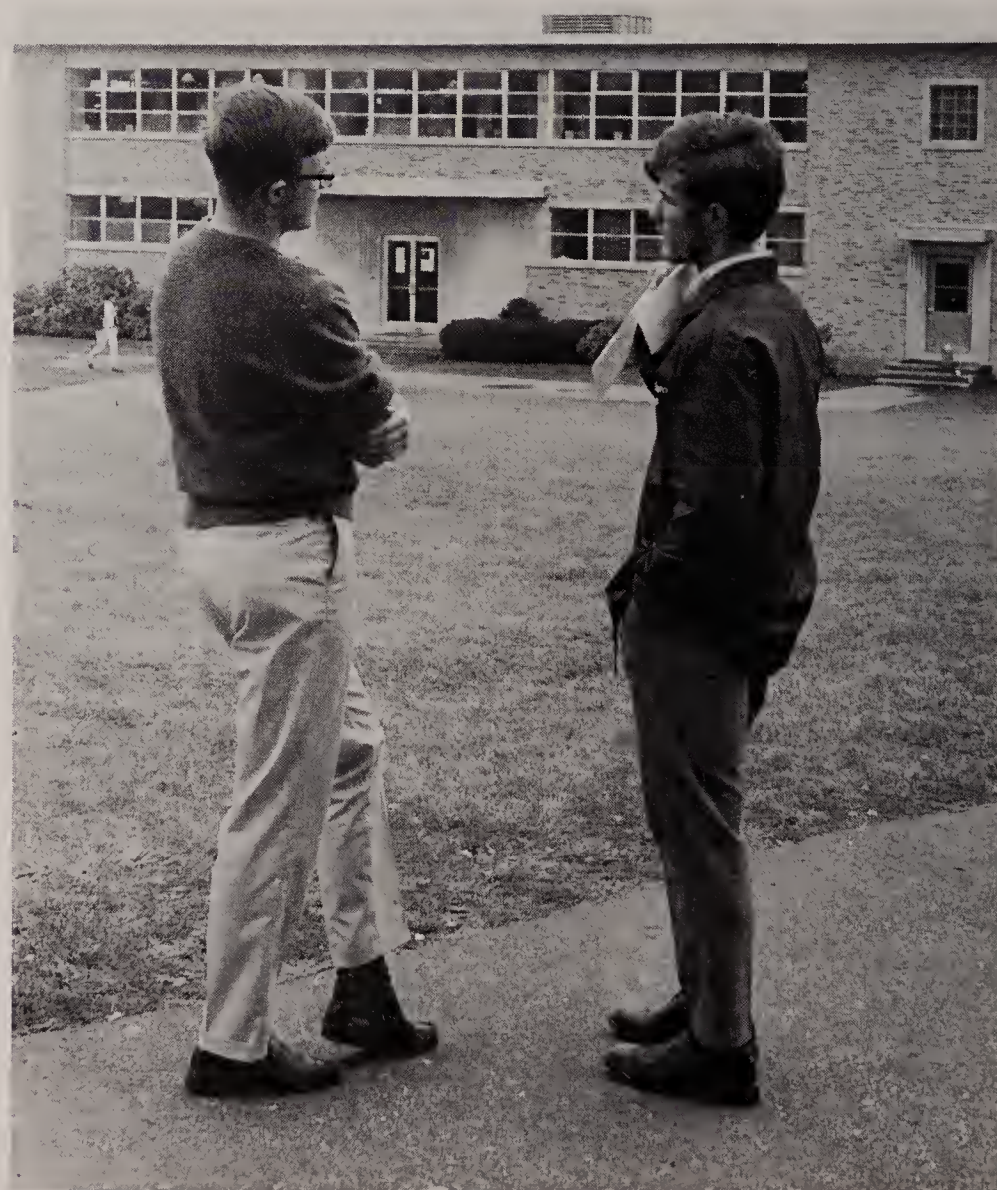

*each . . .
in his own way.*

*And as we moved and grew,
some taught
and some were taught.*

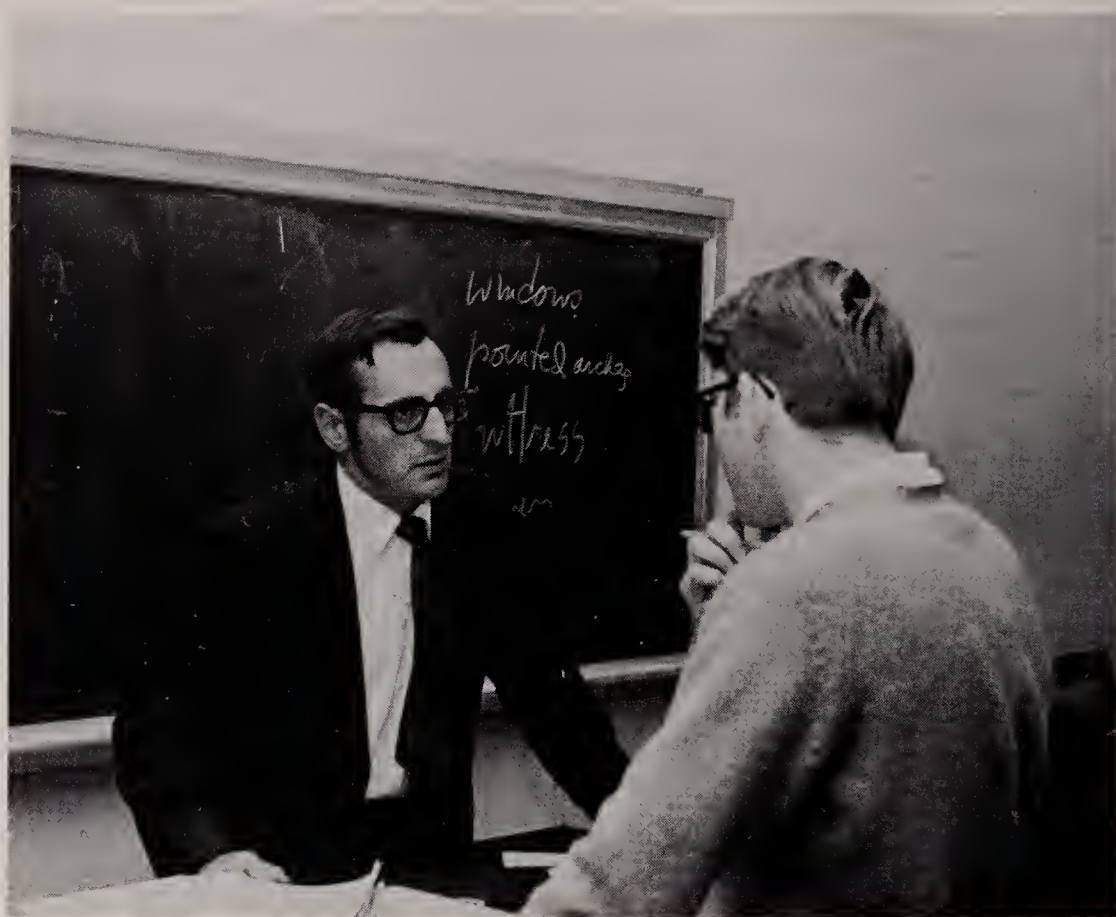

In the effort we had weathered the storm.

*We had questions
that had been answered,
but not in full.*

*Some answers were the same
as we had always found them.*

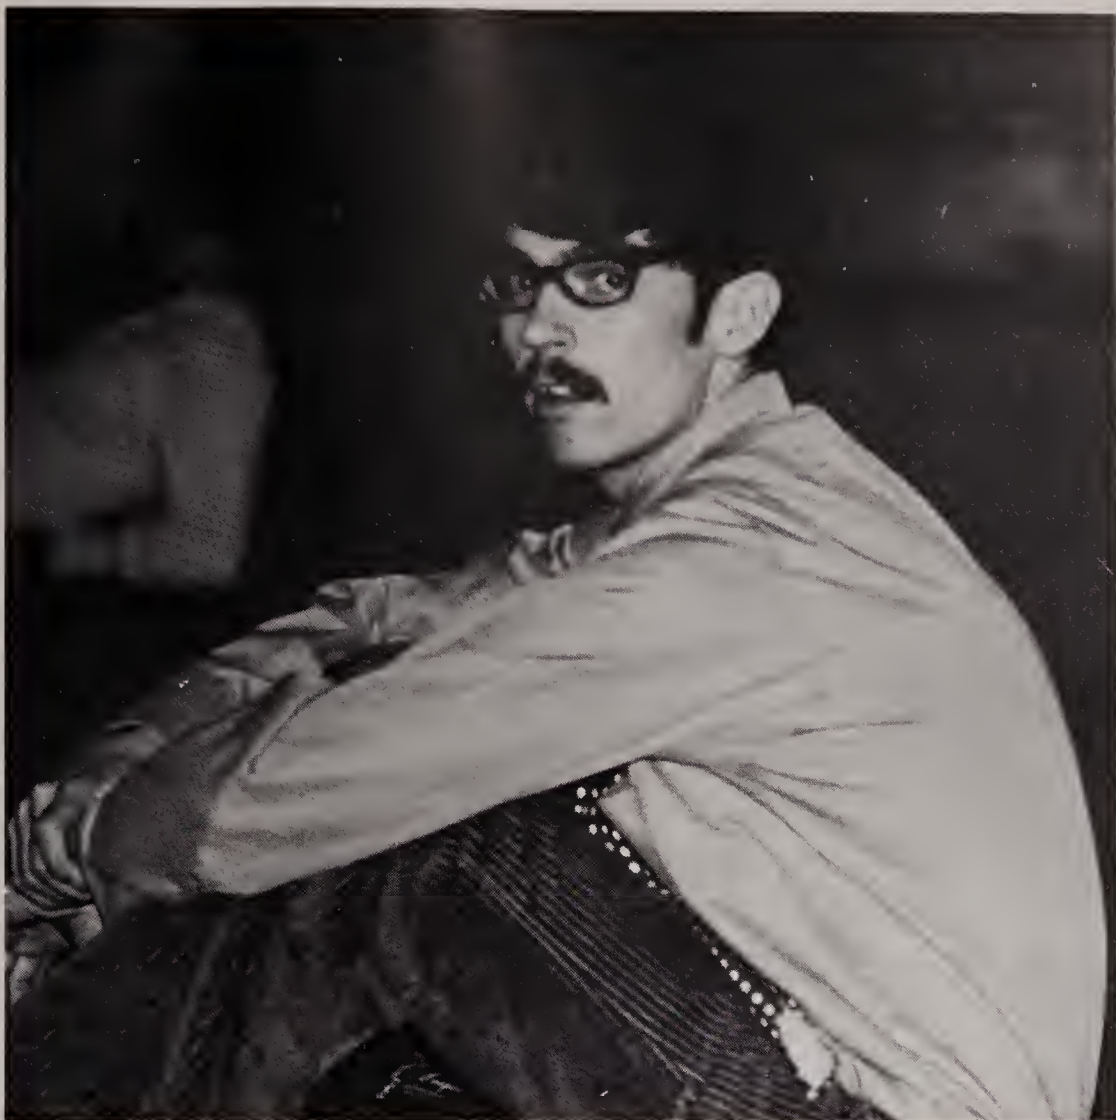

*But we asked the questions again
in hope of finding constancy.*

*We looked for answers,
gave our own
and pressed on.*

Other questions hounded us.

We were our own response to that which we asked.

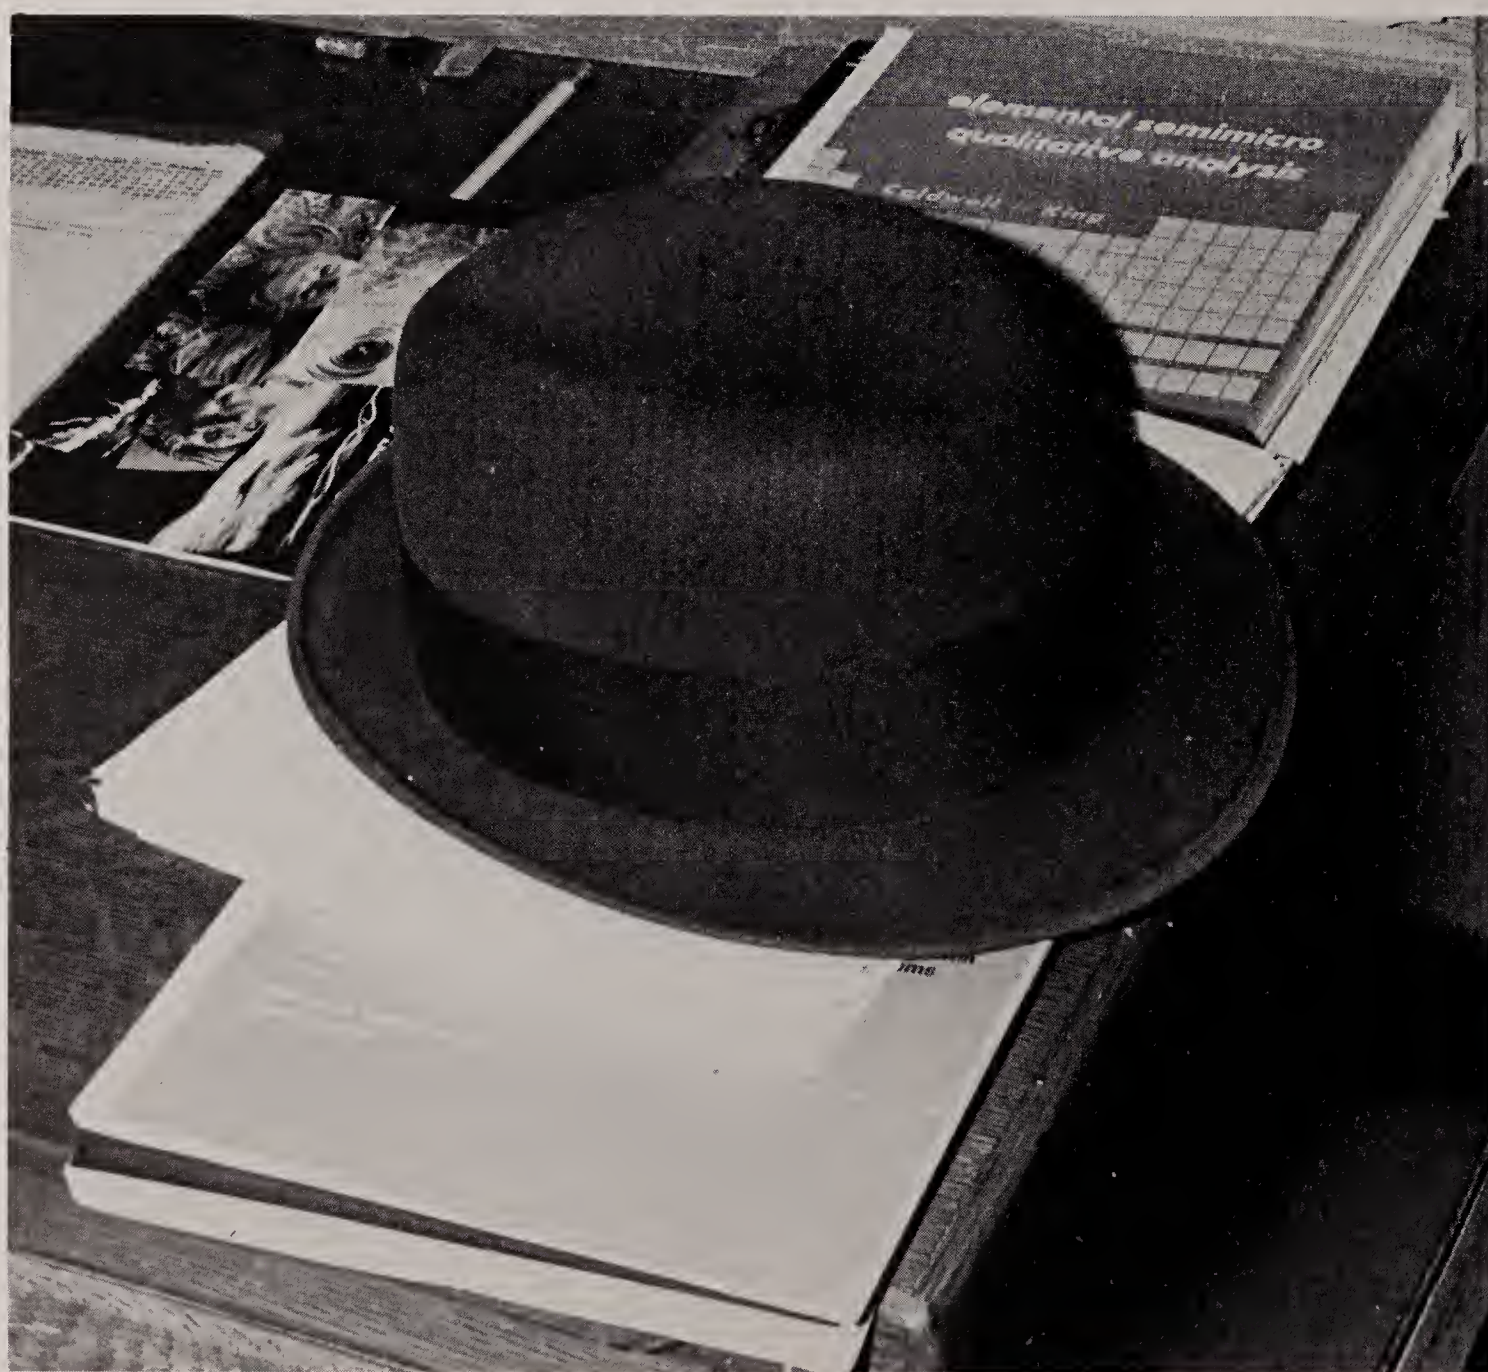

*Our best answer may have been . . .
ourselves.*

*But the questions linger
and our four years were not a terminal journey.*

The questioning goes on.

*And to our surprise—
we may look back over our shoulder
more than once.*

The Class of 1970

"The fundamental fact of human awareness is this: 'I am life that wants to live in the midst of other life that wants to live.' A thinking man feels compelled to approach all life with the same reverence he has for his own. Thus, all life becomes part of his own experience . . . We must try to demonstrate the essential worth of life by doing all we can to alleviate suffering. Reverence for life which grows out of a proper understanding of the will to live, contains life-affirmation."

ALUMNI OFFICE

ASSUMPTION COLLEGE

500 SALISBURY STREET

WORCESTER, MASSACHUSETTS 01609

Dear Class of 1970,

A year ago we told the Class of 1969 that, "these are difficult times." A year has passed and the difficulties modern man faces have remained to challenge the minds and hearts of sensitive and responsible men. Intelligence, freedom and responsibility are characteristics of men who help make progress towards the solution of the problems affecting human kind.

It is the hope of the Alumni Association that each and every graduate of our Alma Mater absorbs these characteristics into his person, so that, no matter which field of endeavor he pursues, he may extend the hand of cooperation to his fellow man in the hope that man can and will solve the enigmas of his existence.

We of the Assumption Alumni offer our very best wishes to the Class of 1970, and hope that where we have failed, you will succeed, and that where we have succeeded, you will understand.

Very sincerely,
Pierre B. Aucoin, M.D.
President Alumni Association

NORTON

...pioneering
pollution solutions
through
**ENVIRONMENTAL
ENGINEERING**

Pollution of our environment is a continuing threat to our health, safety, economic welfare and aesthetic enjoyment. Survival dictates that our environmental resources must be protected from any acts which unreasonably lessen their qualities and adversely affect their level of usefulness.

While considerable progress has been made in pollution control, our resources will be further impaired by population growth, commercial expansion, chemical usages and other technological advancements.

As a member of the Water Pollution Control Federation, the American Water Works Association, and the New England Water Works Association, NORTON COMPANY is pledged to support sound pollution control measures and contribute its efforts to develop economical and effective means of control.

And we mean just that. Whether it be land, water, or air, NORTON COMPANY helps environmental engineers keep it clean. NORTON abrasives are employed in systems which reduce solid wastes to facilitate disposal, incineration, or reclamation. NORTON porous ceramic filtration products diffuse the air which purifies billions of gallons of sewage daily in many metropolitan cities. NORTON fume scrubbers keep dust vapor, and noxious fumes from polluting the air near industrial plants.

But most importantly, NORTON COMPANY salutes the environmental engineering fraternity everywhere for whatever part they play in this profound program. Norton Company, Worcester, Massachusetts.
